

Mr. Edward Wack
Director Future Acquisition
Joint Program Executive Office
for Chemical and Biological Defense

Edward Wack is the Director of Future Acquisition at the Joint Program Executive Office for Chemical and Biological Defense (JPEO-CBD). He is responsible for leading the JPEO's future technology strategy and coordinating that strategy with the other members of the chemical and biological defense program, civilian government organizations, and international partners. He is leading efforts to develop integrated system of systems concepts for CB defense. This includes defining the CBR system concepts for Major Defense Acquisition Programs (MDAPs) such as the Army's Future Combat Systems (FCS).

Before joining the JPEO, Wack spent 13 years at MIT Lincoln Laboratory, a Federally Funded Research and Development Center (FFRDC) administered by the Massachusetts Institute of Technology (MIT). Wack was an Assistant Group Leader in the Sensor Systems and Applications group where he led a team working on standoff sensing, advanced detection algorithms, and system architectures. He has also been involved in various aspects of satellite remote sensing programs including system architectures, sensor designs, sensor calibration and requirements analysis and definition.
